

TRACK SOLUTIONS

HELPING YOU MOVE MORE IRON

AXON

AX220127

We are the AXON providing you support & information, allowing you to move more iron.

This company was started almost 100 years ago out of a passion for keeping agriculture moving. It's that same passion that drives us today. With a vision for a better experience for both farmers and dealers, we set out to create a better way to move more iron.

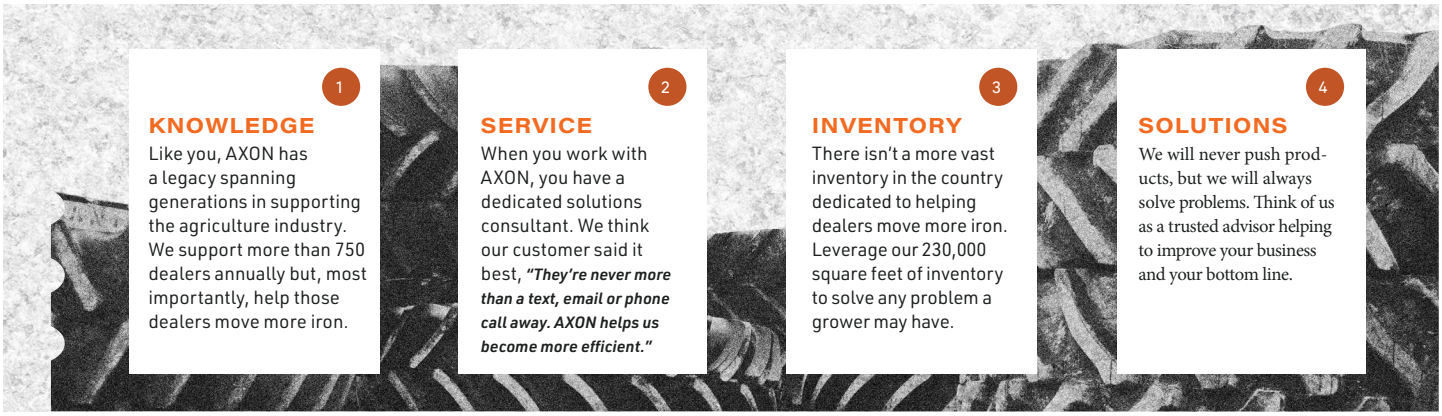

From the staple crops of the Midwest, to the specialized needs of the West, our company provides the most advanced track, tire and wheel fitments, specifically tailored, to deliver the bottom-line best value for your customers.

When you partner with AXON, you immediately gain access to a full range of products and solutions designed to meet today's complex needs.

We carry all major brands and sizes of tires, wheels, and tracks. With over ½ million square feet of warehouse space between our Iowa and California locations, we stock virtually all standard Tracks – in most cases shipping same day!

Like you, our roots run deep! Although much in the world is changing, our family values remain the same, with unyielding commitment to the core principles upon which this business is built: Be the first to bring the very best products to market, charge a fair price, and provide second-to-none service.

At AXON, we make buying Tires, Wheels, and Tracks simple.

1

KNOWLEDGE

Like you, AXON has a legacy spanning generations in supporting the agriculture industry. We support more than 750 dealers annually but, most importantly, help those dealers move more iron.

2

SERVICE

When you work with AXON, you have a dedicated solutions consultant. We think our customer said it best, ***"They're never more than a text, email or phone call away. AXON helps us become more efficient."***

3

INVENTORY

There isn't a more vast inventory in the country dedicated to helping dealers move more iron. Leverage our 230,000 square feet of inventory to solve any problem a grower may have.

4

SOLUTIONS

We will never push products, but we will always solve problems. Think of us as a trusted advisor helping to improve your business and your bottom line.

WHY TRACKS

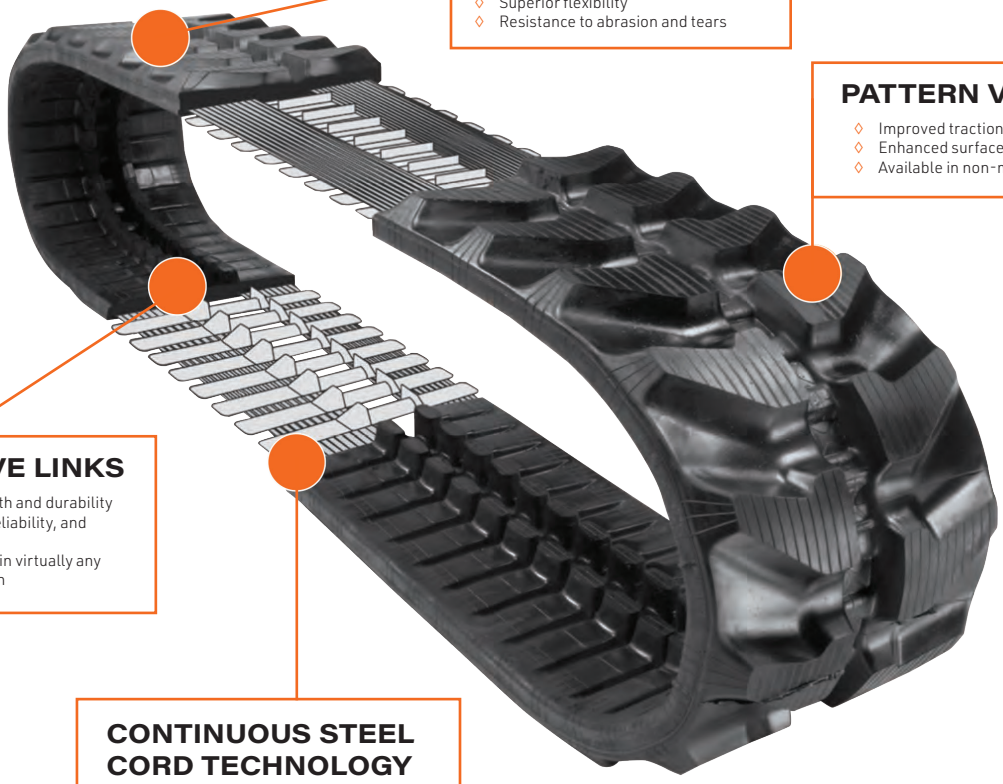

To be honest, I don't shop with anybody else anymore. I tell AXON, 'Here's my situation, here's what they have, and here's what I want to do.' They've done a really good job helping us grow our business and keep our clients happy.

RUBBER COMPOUND

- Precision-manufactured from a combination of high-quality synthetic and virgin natural rubber
- Superior flexibility
- Resistance to abrasion and tears

PATTERN VARIETY

- Improved traction
- Enhanced surface protection
- Available in non-marking compound

STEEL DRIVE LINKS

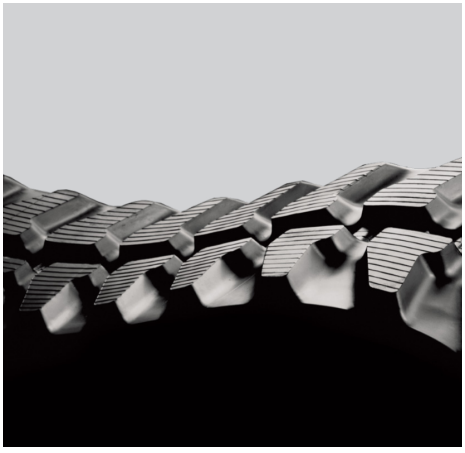

- Unmatched strength and durability
- Ensures fitment, reliability, and longevity
- Reduced vibration in virtually any operating condition

CONTINUOUS STEEL CORD TECHNOLOGY

- Helically wound to improve strength and even weight distribution
- Eliminates seams to ensure the entire track circumference maintains its integrity for life.

To discuss your specific needs, call us at 888-980-1208

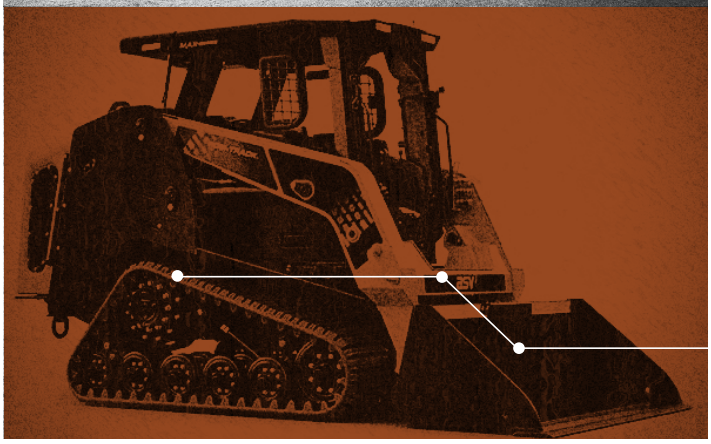

Manufactured using rubber compounds formulated over many years to provide optimum durability and performance in the toughest applications, our track portfolio offers unparalleled value. Designed to eliminate stretch, Continuous Steel Cord "CSC" track construction maximizes strength while minimizing vibration, ensuring smooth operation. Available for 4,000 plus machines, AXON has you covered with our "Guaranteed Fit" warranty program.

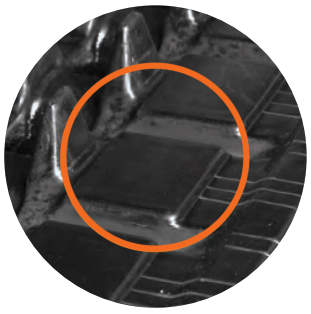

TRACK LOADER

RUBBER TRACKS

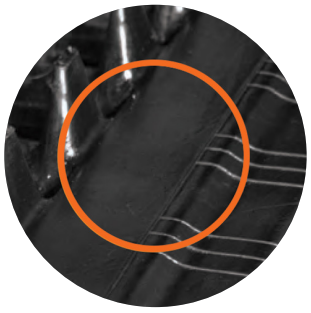

TRACK LOADER GUIDE STYLES

T-GUIDE STYLE

FEATURES:

Raised Blocks for Improved Durability | Prevents Damage to Rail Surface | OEM Specifications for Takeuchi®, Gehl ®, Mustang ® CTL

B-GUIDE STYLE

FEATURES:

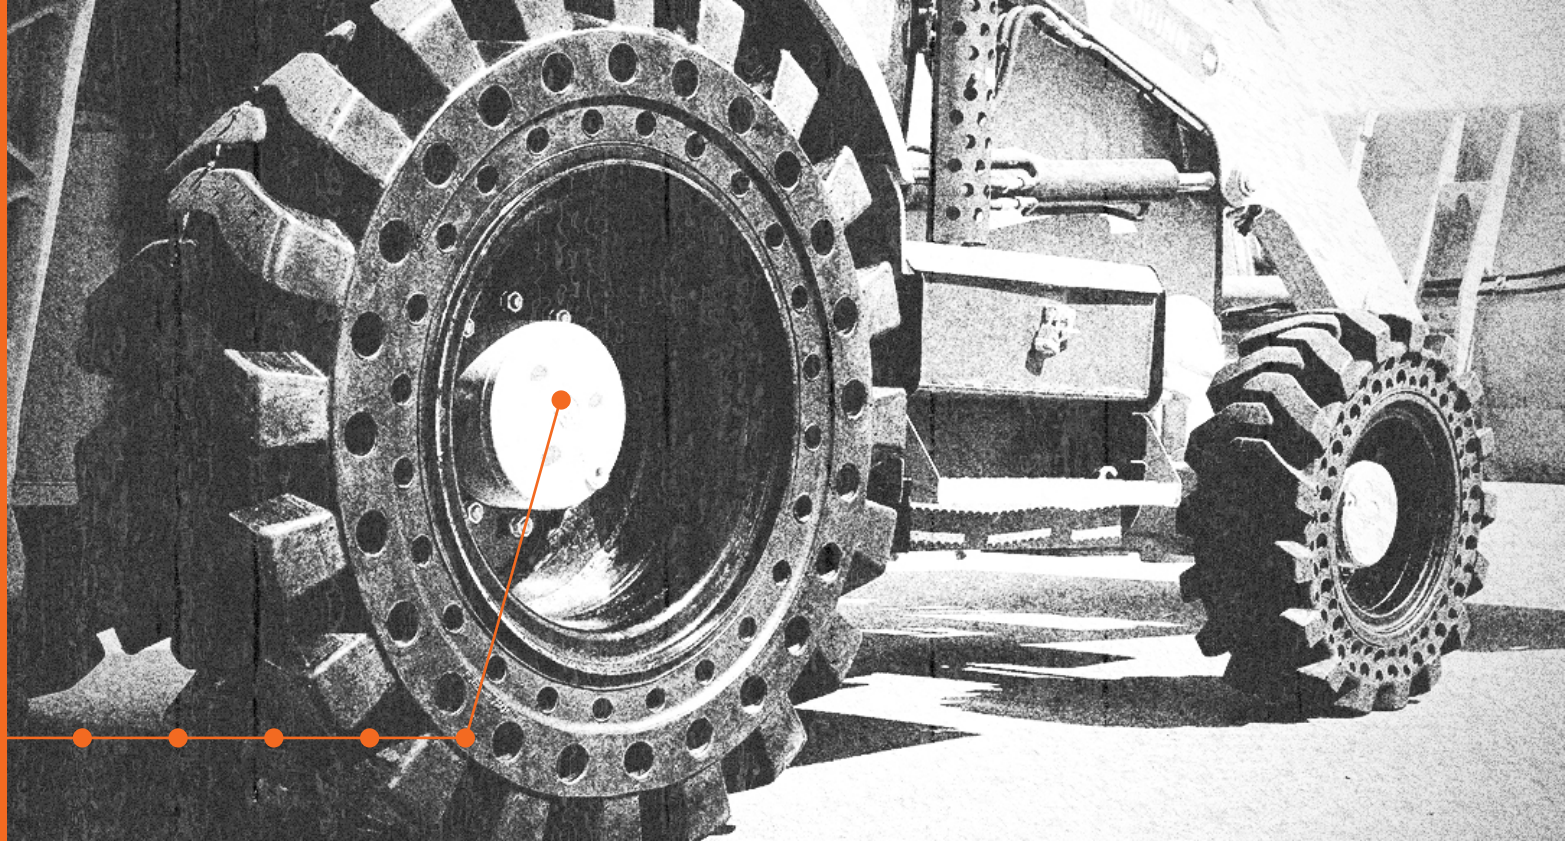

Built Up Smooth Rolling Surface for Smooth Ride | Exact Circumferential Specifications for Many CTLs | Specially Formulated Rubber Compound

TREAD PATTERNS

TERRAIN GUIDE

	• C-LUG	DIRT			ASPHALT	GRAVEL	GRASS
	• STAGGERED BLOCK	DIRT			ASPHALT	GRAVEL	GRASS
	• ZIG ZAG	DIRT	MUD	SNOW		GRAVEL	GRASS
	•MTL	DIRT	MUD	SNOW	ASPHALT	GRAVEL	GRASS
	• EXCAVATOR	DIRT	MUD	SNOW	ASPHALT	GRAVEL	GRASS

SOLID TIRES

HEAVY DUTY

BOBCAT | CASE | CATERPILLAR | GEHL | JOHN DEERE | KUBOTA | NEW HOLLAND | VOLVO | AND MORE

One of the most common problems causing downtime is equipment breakdown; and it's not always something major like engine failure but could be something as simple as a puncture in skid steer tires. What might seem like an easy fix is not the case with skid steer loaders; repair can be more awkward and time-consuming to replace and the work often has to be done in locations/conditions where access might be difficult to service the vehicle.

One way to minimize potential downtime lies with your choice of skid steer tires, specifically the use of solid tires vs. pneumatic tires. Pneumatic tires have a lower price point and may provide a more comfortable ride compared to solid skid steer tires, with one major disadvantage; pneumatic tires will get a puncture/flat, and typically at the most inconvenient times, thereby resulting in unexpected and costly construction delays.

SOLID TIRE BENEFITS INCLUDE:

- ◊ Reduced downtime
- ◊ Puncture resistance
- ◊ Longer wear/durability
- ◊ Less overall maintenance
- ◊ Use in numerous applications
- ◊ Use in more extreme applications
- ◊ Better machine stability (added weight)

PNEUMATIC TIRES

HEAVY DUTY

R4

SIZES: 10-16.5, 12-16.5, 14-17.5, 15-19.5, 10.5/80-18, 12.5/80-18, 16.9-24, 17.5L-24, 19.5L-24

Aggressive swept lug tire pattern designed for a dirt environment. With large voids between lugs and a directional pattern, R4 tires provide great traction for pushing or doing finish grade work. While that tread pattern works great in the dirt, it will chew up turf and wear more quickly (because the pattern's deep voids result in less surface area) on hard surfaces than other patterns.

550

SIZES: 265/70R16.5, 305/70R16.5, 340/80R18, 500/70R24, 540/65R24

550 tread pattern features a special block tread design for high performance on snowy and sandy terrains. The high number of tread blocks and rubber to void ratio provide long tire life, improved performance in hard surface applications.

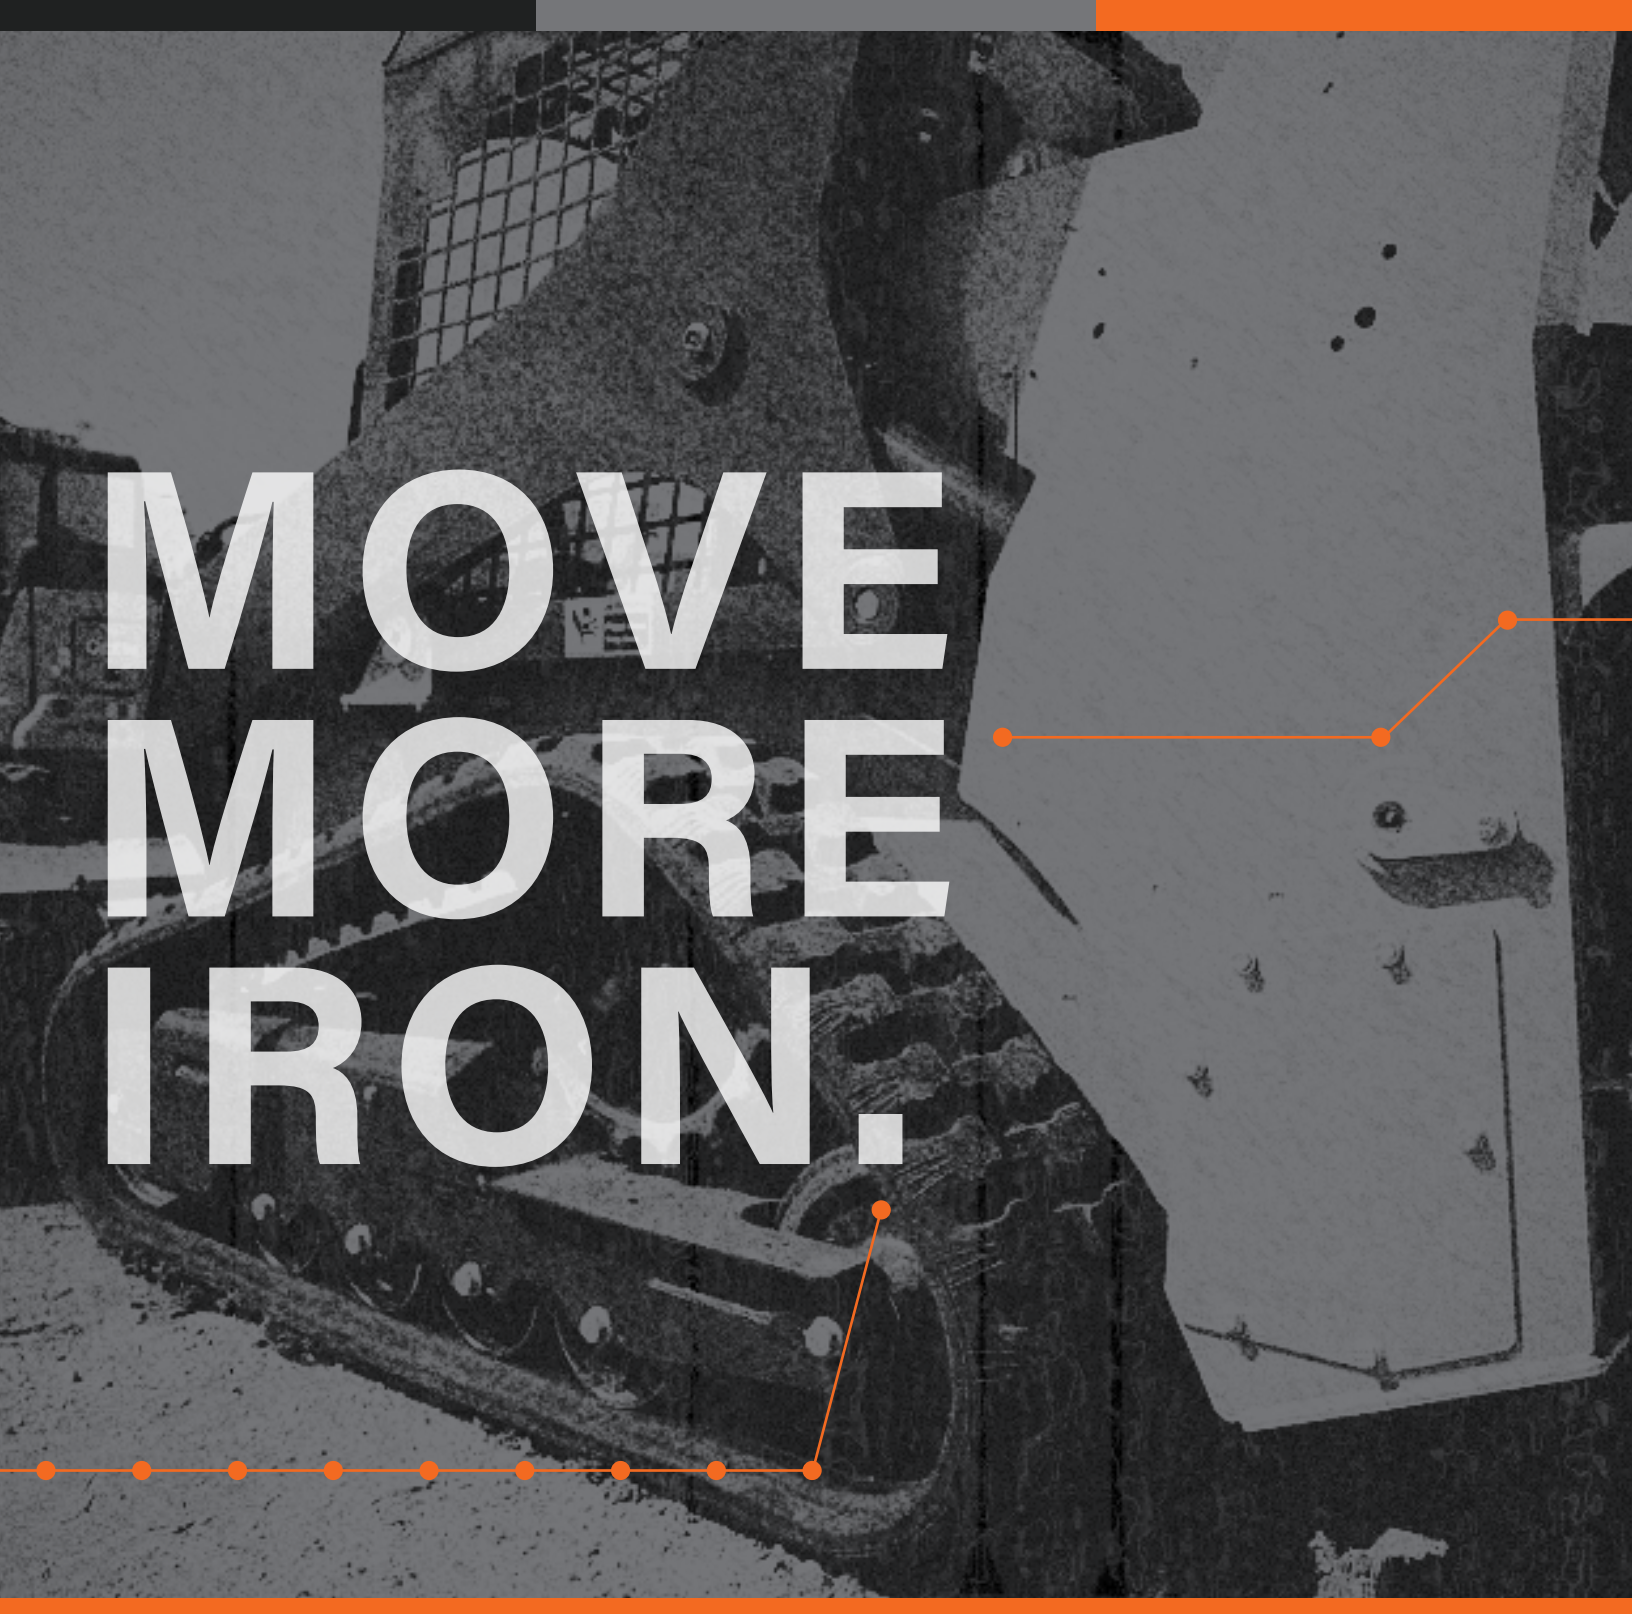

MIGHTY MOW

The Mighty Mow skid steer tire was specially engineered to provide superior flotation characteristics that result in a turf friendly tire that will not damage grass. The Galaxy Mighty Mow skid steer turf tire works exceptionally well on skid-steers that used in lawns, parks, golf courses, sports grounds and cemeteries.

MIGHTY TRAC

The Mighty Trac is specially designed for backhoes and skid steers plying on all types of terrain including snow. The aggressive non directional tread block pattern with stepped lug design provides excellent traction and durability leading to longer tire life.
